

STAR 2

The Star 2 is a range of IP65 close offset architectural floodlights. The Star 2 is therefore ideal for highlighting detail in buildings such as cornices and eaves.

FEATURES

- Range of compact and shallow depth floodlights reducing visual impact making them ideal for hidden installations and applications
- Suitable for indoor and outdoor installations
- Technopolymer frame hinged to body
- Reflectors produced in very pure polished and anodised aluminium
- Asymmetrical, symmetrical and narrow beam options available as standard
- Good anti corrosion properties with stainless steel external screws
- IP65 rated
